FOR IMMEDIATE RELEASE

Flagler County provides debris pick-up schedule

October 25, 2016 – Flagler County’s debris contractor has provided a tentative pick up schedule for unincorporated areas of the county and the towns of Marineland and Beverly Beach. “We know this has been a long process and we have a ways to go,” Commission Chair Barbara Revels said. “Crews are working very hard to get this done as quickly as possible.”

Vegetative debris is scheduled for pick up between now and Sunday in the following locations on the mainland: Fairchild Oaks; Polo Club east off of John Anderson and Polo Club west off of Old Kings Road; Bulow Plantation; and on John Anderson itself through Thursday.

Additionally, crews will be picking up vegetative debris on the beachside through Sunday in the following locations: Island Estates; Sea Colony; the town of Marineland; Marinetime Estates; and, for the remainder of the area north of MalaCompra Road and east of State Road A1A. Pick-up will be done on Saturday and Sunday at Matanzas Shores and Beach Haven.

Currently, vegetative debris is scheduled for pick up next Monday from the Flagler County portion of Plantation Bay, and on November 1 for all of the Hammock Dunes subdivisions and in Palm Coast Plantation off of Colbert Lane.

“As the pick-up in these areas may begin a little sooner,” Flagler County Administrator Craig Coffey said. “This is a tentative schedule because it’s difficult to determine exactly how long it will take in any one area.”

As of the close of business Monday, about 22,000 cubic yards of vegetative debris has been collected from the unincorporated areas out of the currently estimated 40,000 cubic yards needed to be removed.

Construction and demolition (C + D) debris removal has not yet begun and is is planned to begin this Thursday. Once it begins, pick-up will begin on the beachside from the north county line in the town of Marineland and will continue southward to Flagler Beach.
