FOR IMMEDIATE RELEASE

County debris hauling to focus on John Anderson, Old Kings, Black Point, Espanola

October 9, 2017 – Contracted debris haulers and Flagler County staff have completed vegetative debris hauling on public roadways in Zone 1 – the area east of Interstate 95 and north of State Road 100. This does not include private roads.

A total of 11,884 cubic yards of debris – 645 truckloads – has been collected and transported to the final disposal site between September 21 and October 5 from some 75 roads and four Flagler County parks. Collection from Princess Place Preserve is ongoing.

“Due to the widespread impact of Hurricane Harvey in Texas and Irma in Florida, the demand for trucking services has greatly exceeded the available resources,” said County Engineer Faith Alkhatib. “In an effort to expedite debris removal as quickly as possible, we have deployed our own resources – trucks, equipment, and labor – toward the debris collection.”

Roadways of focus for the coming week include: John Anderson Highway, Old Kings Road South, Black Point Road, and Espanola.

Flagler County and its contracted consultant, Eisman & Russo, are providing monitoring and documentation services in accordance with FEMA requirements.

“The bulk of the vegetative debris collection has been done by Flagler County staff, who have been diligently working 12 hours a day, seven days a week,” County Administrator Craig Coffey said. “We appreciate everyone’s patience as we continue through the collection process.”

Privately-maintained roads require “legal right of entry” forms from individuals, and from homeowners associations where applicable.

Any HOA with non-public streets may contact Michael Esposito at 386-313-4040 or by email at mesposito@flaglercounty.org with a subject of “HOA debris agreement,” if you have not received an agreement.

http://www.flaglercounty.org
There will be a second pass made only for the flooded areas of unincorporated Flagler County to collect construction and demolition (C&D) debris, to include drywall, lumber, carpet furniture and plumbing and white goods, such as refrigerators, stoves, water heaters, dishwashers, washer/dryers and air conditioners.

Further information will be provided about this pickup at a later date. Debris should be separated by category.

Do not mix vegetative debris with other items or it will NOT be collected. Do NOT bag debris. Regular household garbage should also be separated. The debris should be placed immediately adjacent to the right-of-way where it will be collected.

Household hazardous waste and electronics will not be picked up curbside and should be brought to the drop-off center located at 1700 South Old Kings Road. Hours of operation are Monday through Friday 7 a.m. to 3:30 p.m.
