FOR IMMEDIATE RELEASE

Mosquito Aerial Spraying Scheduled for Thursday

September 20, 2017 – Due to a surge in the mosquito population caused by flooding related to Hurricane Irma, aerial spraying for mosquitoes in Flagler County has been scheduled for the evening of September 21.

Weather permitting, spraying will take place from dusk to dawn, from approximately 8:00 p.m. Thursday through 5:00 a.m. Friday.

The decision to begin aerial spraying was made due to the overwhelming increase in the mosquito population, with the advisement of County health officials and in direct response to citizens’ recent requests.

“We are very appreciative to state of Florida officials for their responsiveness,” said Commission Chair Nate McLaughlin. “They were very cooperative and receptive to fast-tracking the District’s Mosquito Control Response.”

At this time, there have been no reported or confirmed mosquito-borne diseases in Flagler County. Should you have any questions or concerns about aerial spraying please contact East Flagler Mosquito Control District 386-437-0002.
