RE: Medical Records of Employees of the Flagler County Sheriff's Office

Dear Mr. Bichler,

As you may be aware, all employees whose main work location is the Operations Center of the Flagler County Sheriff's Office have been relocated to alternate work locations while extensive investigation and testing can be conducted. Further, the Flagler County Sheriff's Office has directly hired a medical doctor to provide expertise regarding the medical conditions of affected employees.

As part of the testing and review process, an important part of this investigation is the medical conditions of the employees. As such, we are requesting all medical records of the diagnosis, prognosis and treatment of all the Flagler County Sheriff's Office employees you represent. Please redact any indentifying information.

The medical component is an important part of the investigation of the building being conducted by Engineering Systems, Incorporated (ESi), the company conducting environmental testing. We are also asking to share any medical information provided with ESi so the testing can be guided by the medical conditions of our employees.
